## TECHNICAL CERTIFICATE NO.

Customer:

Gungan Sp. z o.o.  
ul. Boczna 4/310  
50-502 Wrocław

Device owner:

Item name:

Pneumatic play device

Item type:

Supplier, year of production:

Distributor, GunGan Sp. z o.o., 2025

Basic technical information:

Overall dimensions: length 8.0 m, width 6.0 m, height 4.8 m. Cushion thickness 0.6 m.  
Special features: multi-coloured device. Vertical posts and horizontal beams on the cushion.  
Walls filled with fine-mesh mesh. Inside the device: slide and inflatable obstacles. Blue slide.  
Entrance to the starting ledge through a ladder. Safety net above the starting ledge. Air supply to  
the device: 2.4 kW, 230 V, 50 Hz drum fan. Automatic pressure regulation through the seams  
and sleeve. PVC material 0.52 mm thick.

Description of the technical condition:

Four-fold seams at the base, the remaining seams are double. The quality of the  
seams is very good. After filling with air, the coating spreads evenly. The number of fixing  
points is sufficient. Very good technical condition. The hardness of the base is regulated  
automatically by the seams and sleeve. The engine and fan are technically efficient.  
Operation in winds above 5 m/s is prohibited. **A device not attached to the ground at all  
construction points is treated as technically defective.** The device meets the requirements  
of the Polish Standard PN-EN 14960:2019.

Fire tests:

Electrical protocol

Attached Document:

DTR

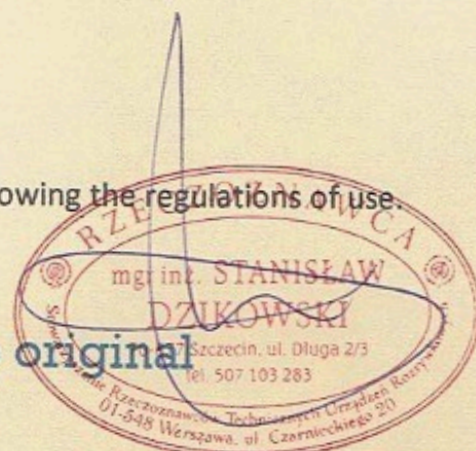

Date and place of test:

Final opinion:

The device is technically functional. Safe operation when following the regulations of use.

Technical opinion valid until 09.02.2027

This Certificate is valid only in the original
